

Getting Started – CMS Menu (Custom Options)

These menu items will only display if included in your website package. They are not included with the CMS by default.

Alerts*: Add notifications on top of the website home page for alerts. It can be used for multiple reasons such as Covid protocols, sale, discounts etc

Case Study*: Showcase your success stories, various client stories can be published.

Testimonials*: Like case study module, you can showcase your client feedbacks, reviews, ratings, recommendations received.

Forms*: Add contact form, donation form, nomination form, registration form, etc on your website using this module. Features - view submissions, export them as csv.

Emails*: Related to the form's module, use this to send auto email responses for form submissions, welcome emails, members notification, event registration, payment confirmation.

FAQ's*: To add FAQs to your website for generic, recurring, expected questions.

Sectors*: Add different business sectors that you expand into or provide services to. Can be used to bifurcate basis sector or industry type specifications. Eg - Healthcare, education, retails.

Products*: Like sectors, demonstrate all different products (or services) to offer, along with specifications, images, videos, etc.

Transactions*: Integrate ecommerce (e.g.- PayPal, stripe, etc.) and see transactions details with an easy export option, customization can be done as needed.
